Approved For Release 2000/08/25 : CIA-RDP57-00384R001300070032-8

To: Deputy Chief FDB

From [redacted] 25X1A

Subject: Specific use of Intelligence from Documents

On 18 June 1945 a Japanese Lt (jg) Takeshita was killed in action on Okinawa. His diary was taken and was translated.

From the diary it was discovered that this officer, with others was receiving a supply of food from the Leprosarium on Yagachi Shima, off Okinawa. This food was being supplied by American MG.

An investigation was undertaken, for previous to this USMG had no suspicions of the personnel of the Leprosarium. From the investigation the facts as given in the diary were confirmed and appropriate recommendations made.

I have in my possession a copy of the translation of the diary and a full account of the facts leading up to and covering this investigation as reported to the Deputy Commander for Military Government, Okinawa.
